

project brief

TYPE OF FACILITY:
Hospital

Grady Memorial Hospital

■ Atlanta, Georgia

Grady Memorial Hospital, part of the Grady Health System, located in Atlanta, Georgia is a 953-bed facility. Originally a 110-bed facility, the hospital has grown exponentially since its opening in 1892. The Grady Health System is currently the largest public health system in the United States.

Grady Memorial Hospital was in need of replacing their chiller piping system and dedicated a 60 day schedule for system installation; Victaulic was chosen to expedite the job. Victaulic provided project management services including material handling and drawing quotes from Construction Piping Services. Despite the tight schedule, Victaulic was able to provide an extensive mechanical piping system for the job by utilizing the Advanced Groove System™ on 14-16"/350-400 mm pipe.

SPECIFICATIONS:

SERVICES:	PIPE MATERIALS:	PIPE SIZE RANGE:
Chiller Replacement	Carbon Steel	10 – 16"/250 – 400 mm
Condenser Water Supply & Return	Carbon Steel	16"/400 mm
