

## project brief

**TYPE OF FACILITY:**  
Chemical Plant

## CSBP Plant Upgrade

■ Kwinana, Western Australia

CSBP are currently undertaking an expansion to their Ammonium Nitrate Facility and as such new safety showers & eyewash stations are being installed throughout the plant as part of the ongoing efforts to provide worker safety in the event of an emergency.

316SS Pressfit was chosen because of the plants coastal location; it provides a piping system that is resistant to corrosion from seawater and allows workers to safely install a system without the need for any hot works. The Pressfit systems also provided installation time savings above and beyond welded or threaded systems.

### SPECIFICATIONS:

SERVICES:	PIPE MATERIALS:	PIPE SIZE RANGE:
Eye Wash Water	316SS	25 mm – 50 mm

**MARKET:**  
Industrial

**VICTAULIC SOLUTIONS:**  
- Corrosion resistance  
- No hotworks are needed  
- Installation time savings

**OWNER:**  
CSPB

**CONTRACTOR:**  
CSPB

**ENGINEER/CONSULTANT:**  
CSPB

**COMPLETED DATE:**  
2007
