

project brief

TYPE OF FACILITY:
Paperboard Mill

Atlantic Packaging Paperboard Mill

■ Scarborough, Ontario

Atlantic Packaging, a leading Canadian manufacturer of corrugated boxes, bags, and consumer tissue products, started production of recycled corrugated medium at their new Scarborough plant in April 2006. Construction of this new plant required a reliable small bore piping solution that was fast and easy to install.

The solution of choice was the quick-connect Victaulic stainless steel Pressfit System. Installers were able to permanently join 304 stainless piping quickly and economically in sizes ranging from ½ - 2" using the Victaulic Pressfit Tool. Not only did Pressfit provide a clean, efficient, and easy installation, but the system also eliminated any threat of leakage commonly experienced when threading small bore stainless pipe.

MARKET:
Industrial

VICTAULIC SOLUTIONS:
Speed of installation, reliability

OWNER:
Atlantic Packaging Products Ltd.

CONTRACTORS:
Laframboise Contracting

ENGINEER/CONSULTANT:
Atlantic Packaging Products Ltd.

COMPLETED DATE:
2006
