

## project brief

### TYPE OF FACILITY:

Plant

## Brooks Run Prep Plant

■ Birch River, West Virginia

The Brooks Run plant needed to add a fine coal column flotation circuit. Victaulic valves were ideal in this application due to their full flow capability and the Style 99 Roust-A-Bout® couplings allowed for easy equipment access.

### MARKET:

Mining

### VICTAULIC SOLUTIONS:

Ease of installation, valves were full flow, 99's allow for equipment access

### OWNER:

Brooks Run Coal

### CONTRACTOR:

Daniels Company

### ENGINEER/CONSULTANT:

Daniels Company

### COMPLETED DATE:

2000

### SPECIFICATIONS:

SERVICES:	PIPE MATERIALS:	PIPE SIZE RANGE:
Fine Coal Slurry	Carbon Steel	4 – 6"/114.3 – 168.3mm
Coal Slurry	Carbon Steel	4 – 18"/114.3 – 457.0mm
