

## project brief

### TYPE OF FACILITY:

Plant

## Liberty Processing B Plant

■ Madison, West Virginia

The Liberty Processing Plant in Madison, West Virginia needed an addition for extra processing capacity.

The speed of installation of the Victaulic 304 Stainless Steel Vic-Press System made Victaulic the right choice over a threaded carbon steel system. The Victaulic Style 99 Roust-A-Bout® couplings also allowed for easier equipment access.

### SPECIFICATIONS:

SERVICES:	PIPE MATERIALS:	PIPE SIZE RANGE:
Compressed Air, Plant Water	Stainless Steel	2" (60,3 mm)
Coal Slurry	Carbon Steel	4" – 18" (114,3 mm – 457,0 mm)

### MARKET:

Mining

### VICTAULIC SOLUTIONS:

Speed of installation,  
easy equipment access

### OWNER:

Massey Energy

### CONTRACTOR:

Sedgeman

### ENGINEER/CONSULTANT:

Sedgeman

### COMPLETED DATE:

2001
