

project brief

TYPE OF FACILITY:
Coal wash plant

Saraji Coal Wash Plant Extension

■ Saraji, Queensland, Australia

The upgrading of the existing coal wash plant needed a versatile piping system that could be constructed throughout the structure easily and quickly.

The Victaulic Pressfit 316 stainless steel system was selected for the job due to its quick and easy method of installation. The site personnel had never used Pressfit before and installed the pipeline quickly without any rework or leakage.

SPECIFICATIONS:

SERVICES:	PIPE MATERIALS:	PIPE SIZE RANGE:
Plant Water	316 Stainless Steel	20 – 50 mm

MARKET:
Coal mining
