

project brief

TYPE OF FACILITY:

Mine

92C Conveyor Upgrade

■ Tom Price, Western Australia

Pilbara Iron recently installed new conveyor belts at the Tom Price Iron Ore Mine, where Victaulic was utilised along the whole length of the conveyors for fire protection services.

Victaulic FireLock products were chosen to provide a UL/FM Approved rigid joint that provided easy installation without the need for onsite welding. It also provided a quick method of construction which minimised labor hours and the time contractors spent exposed to the extreme outdoor heat conditions of the Pilbara.

SPECIFICATIONS:

SERVICES:	PIPE MATERIALS:	PIPE SIZE RANGE:
Fire Systems	Galvanized Carbon Steel	6" and 8"/168 mm and 219 mm
